

(A) This rule shall apply to persons involved in developing and implementing integrated pest management (IPM) activities for non-agricultural uses in this state. This includes pesticide businesses, school personnel or any other individuals conducting IPM activities. In order to be considered an IPM activity under this rule, the activity shall include the elements set out in paragraph (B) of this rule.

(B) Persons developing and implementing IPM activities shall:

(1) Conduct a comprehensive site assessment of the property for which the IPM activity is being developed. This assessment shall identify the:

(a) Structural, mechanical, storage or sanitation conditions that are producing or could produce pest problems, including pest entry points and areas prone to pest harborage;

(b) Type and extent of pest activity; which may be determined by using monitoring devices when practical; and

(c) Potential impacts presented by the pests to humans, domestic animals and environment;

(2) Determine with the entity contracting for service:

(a) Structural, mechanical, storage or sanitation-related measures that will aid in long-term prevention, elimination or control of pests;

(b) Priorities for pest control and elimination;

(c) Whether chemical control is necessary to prevent, eliminate or control pests; and

(d) The most effective measures, application products and methods that will result in control of pests while minimizing exposure to humans, domestic animals and the environment;

(3) Establish with the entity contracting for service a strategy, schedule, and specific recommendations for ongoing site monitoring and assessment to resolve short term and long-term control or elimination of pest problems consistent with this paragraph; and

(4) Evaluate the results of implementing the IPM activity in accordance with a time frame agreed to with the entity contracting for service. The evaluation shall include a re-assessment of the site and consider whether:

(a) Correction of structural, mechanical, storage or sanitation problems was completed and effective;

- (b) Methods used to prevent, control and eliminate pests at the site were effective;
- (c) Risks of exposure to humans, domestic animals, and the environment were sufficiently minimized; and
- (d) Other measures, products or methods should be chosen for future pest management and control.

Promulgated Under: 119.03  
Statutory Authority: 921.18  
Rule Amplifies: 921.01, 921.18

(A) This rule shall apply to schools established under Chapter 3311 of the Revised Code, education service centers, community schools established under Chapter 3314 of the Revised Code, STEM schools established under Chapter 3326 of the Revised Code; and non-public schools chartered by the state board of education pursuant to Section 3301.16 of the Revised Code.

(B) Pesticides for the control of structural pests shall be applied at the school only if:

(1) The pesticide is applied at a time when the school day has concluded or when school is not in session under the calendar set by the school board; or

(2) The pesticide is applied during the day so long as:

(a) Persons other than pesticide applicators and necessary school staff are not scheduled to be in the treatment area for the longer of four hours or the minimum time specified by the label of the pesticide applied, if any is specified, as measured from the time that the pesticide application is completed; and

(b) The area in which the pesticide is applied is posted with signs meeting the following requirements:

(i) The sign shall measure at least eight and one half inches by eleven inches; and

(ii) The sign is printed with letters at least two inches in height with the following wording: "Pesticide Treatment Area. Do Not Enter Before (the date and time where re-entry will be permitted into the treatment area)." The time shall be the later of four hours or the minimum time specified on the label, as measured from the time that the pesticide application is completed; or

(3) The pesticide applied is one of the following, and is applied in strict accordance with label instructions:

(a) Manufactured paste or gel baits;

(b) Paraffin-based rodent control products placed in industry-identified tamper-resistant bait stations;

(c) Termite-baiting stations

(d) Rodenticides which are placed in wall voids or other areas that are inaccessible to humans and domestic animals;

(e) Disinfectants, sanitizers, germicides, and anti-microbial agents; or

(f) Dusts used in unoccupied areas of the structure; and

(4) If one of the conditions in paragraph B(1), (B)(2) or (B)(3) of this rule has been met, the following information shall be provided to the school's contact person identified under paragraph (C)(2) of this rule as soon as practicable following the application:

(a) Date and time that the pesticide was applied;

(b) Treatment area;

(c) Target pests;

(d) Brand name and EPA registration number of the pesticide applied; and

(e) Time or conditions for re-entering the treatment area as specified by the label of the pesticide applied, if any is specified.

(C) Any school subject to this rule shall:

(1) Develop a policy whereby parents or guardians of minor children, adult students, faculty and staff who are enrolled or employed at the school may request and receive prior notifications of service visits during which pesticide may be applied at the school. The method of prior notifications shall be determined by the school and may include but shall not be limited to e-mail and listserv methods; and

(2) Designate a school employee to serve as a contact person for pesticide applications made at the school. This contact person shall maintain for inspection by the director or their authorized representative:

(a) Records provided to the contact person pursuant to paragraph (B)(4) of this rule. The records shall be maintained for a period of one year following the date of the pesticide application; and

(b) Documentation that requested notifications were made pursuant to the school policy established under paragraph (C)(1) of this rule.

(D) Guidance for principles of integrated pest management may be published on the department's website or otherwise disseminated as determined by the director.
